

The ASI logo is located in the top left corner of the header. It features the letters 'ASI' in a white, serif font against a dark blue background. To the right of the logo, there are faint, stylized icons of a globe, a document, and an '@' symbol, all in a light yellow/green color.

delivering solutions

FirstEnergy

Imagine. You have combined seven electric utility operating companies into the nation's 4th largest investor-owned electric system. You serve 4.3 million customers within 36,100 square miles of Ohio, Pennsylvania and New Jersey. You have set your sites on becoming the leading retail energy and related services provider in the northeastern quadrant of the United States. To do it, you have to become one operating force by standardizing and automating your map and records storage methods corporatewide.

So what do you do?

You call on ASI to integrate existing and future engineering GIS applications and establish a fully updated database for use by each of your business units. And naturally, the sooner the better. ASI establishes a central "coordination" environment for digitizing landbase sources and then provides the data collection base for six types of manual and computerized records. The solution merges multiple paper source documents and migrates all digital data into one GIS environment. The data is loaded directly onto your server for your immediate access.

Success

All of your business units now have immediate access to vital information that enable them to make better decisions to reduce costs, improve productivity and increase customer satisfaction.

Data Solutions That Power Your Business

A large, light blue, semi-transparent version of the ASI logo is centered at the bottom of the page.
